MEMORANDUM FOR: U/OP - Mr. Richards  
U - Mr. Reams  
TRC - Mr. Nesbitt

I discussed with General Cutler this morning the contents of his memorandum of May 29 regarding reciprocal radio arrangements. General Cutler agreed that with respect to paragraph a, that the report by the Director of Central Intelligence is to be made after consideration of the problem by CIA, Defense and State. The report would reflect the views of the three departments.

General Cutler agreed also that paragraph b, regarding existing U.S. Governmental facilities is really not directly related to the present proposal for reciprocal agreements permitting the use of radio transmitters in Embassies. The President's interest in b, relates to the question whether there is not a possible economy to be affected after survey of the communication facilities maintained separately by the Army, Navy and the Air Force.
